Real Estate

AIM:

To develop a comprehensive online platform that seamlessly connects buyers and seller thus eliminating the middle man (broker)

DESCRIPTION:

TerraConnect (real estate website), revolutionizes the land buying and selling experience by cutting out the middleman and empowering direct connections between buyers and sellers. By providing detailed listings and contact information while maintaining the privacy of both parties, we enable seamless communication and negotiation. Our platform does not facilitate transactions, instead, it empowers users to interact independently and finalize deals on their terms. By harnessing the power of google maps api and integrating it seamlessly into our platform we aim to streamline the land transaction process and empower individuals to make informed decisions without the need for intermediaries
